# Create a resource group · · ·

Basics    Tags    Review + create

**Resource group** - A container that holds related resources for an Azure solution. The resource group can include all the resources for the solution, or only those resources that you want to manage as a group. You decide how you want to allocate resources to resource groups based on what makes the most sense for your organization. Learn more ⧉

# Create a resource group

Basics    Tags    Review + create

Apply tags to your Azure resources to logically organize them by categories. A tag consists of a key (name) and a value.
Tag names are case-insensitive and tag values are case-sensitive. Learn more
